

Write Your Book in 20 Minutes DVD Reviews

“After taking an online course with Eva, I decided to order the DVD to ‘attend’ one of her seminars and ‘meet’ her on a different level. As you can tell by some of the other reviews, Eva attracts followers. Its an excellent seminar. If you don't know what the bubble method is -- this DVD will pay for itself in the first 15 minutes!” Dr. Pete, Buffalo, NY

“Are you serious about writing? If your answer is Yes! then this DVD will help. Filmed at one of her seminars, Eva Shaw covers the Bubble Method for brainstorming and organizing ideas. She demonstrates the method's use, explaining as she goes, and includes clips from the audience question and answer period at the end. The same method can be used for articles, short stories, and pretty much any other form of the written word. I've watched it a couple of times and recommend it for anyone overwhelmed by the task of assembling their thoughts and notes into a well-planned piece of work. So, that being said, are you serious or not?” William W., Waynesboro, VA

Eva Shaw is an encouraging, enthusiastic, and wonderful teacher, and she shares some of her writing expertise in this interesting and informative DVD. I had brainstormed writing ideas before. I had sometimes used clustering and mind mapping to generate and organize ideas. I had read Eva's descriptions of the Bubble Method (her term for this technique of brainstorming and organizing)... But actually seeing the bubble method in action was enlightening! Watching Eva brainstorm and use the bubble method with a group of writing workshop participants, was like seeing the pieces of a puzzle fall into place. The bubble method came alive for me, and the thought of putting the bare bones of a book together quickly and easily became real. The question and answer session at the end, as well as the writing tips Eva shares as she demonstrates the bubble method, were also great additions to the DVD's content. I'm sure I'll be watching this DVD many times -- not only for information, but also for inspiration. Genna, USA
