

## What Readers are saying about Writeriffic II

Eva Shaw knows of what she speaks. Her gifts to us are extraordinary, not only because she is a working writer and an active mentor, but perhaps more importantly, because she shares unselfishly from the heart and her very own school of hard knocks. "Writeriffic," the book, reflects the Eva I have come to know and respect through three of her on-line classes, including "Writeriffic" and "Advanced Writeriffic." She is concise, practical, poignant, positive, and inspirational ~ and gives great "nudges" to boot.

For those of you who express concern about so many "blank pages," be reminded that writing is all about practice, practice, practice. Also be on guard: Eva's exercises in the book, as with her on-line classes, are deceptively simple. My copy is now dog-eared, coffee-stained, stuffed with post-it notes, and smothered in exercise scribble (some of which constitutes first, very rough drafts of works to come). This is a great reference book, practice journal, and guide for the emerging writer ~ in any genre. It will unleash your creative right brain ~ guaranteed. I say buy it, use it, and savor the rewards! – Taylor, Oregon

---

I took Eva's online course by the same title, not knowing what to do with a blank page. The course was comprehensive, well organized and motivational. It got me pointed in the right direction. I even had something published. After the class ended I purchased this workbook and it has proven itself invaluable. I am addicted to the exercises, especially the "wordy fun" and "365 or more". Eva has a real talent for giving you the tools you need to become a writer and grow as a writer. I may have to get another one since mine has become pretty battered over the summer-coffee stains and chlorine, plus I'll need more room! – Terry, New Jersey

---

I just read, on Amazon.com, a negative review on this journal/workbook by writing expert Eva Shaw and I **laughed**. Many think that one becomes a writer without writing or practicing the craft. What a chuckle. I liked this tool a lot and have given it to serious writing friends. Maybe the idea of filing in those blank pages with creative thoughts and carrying the book around scared the negative reviewer, but hasn't scared my writing group. – Chris, Atlanta, GA
